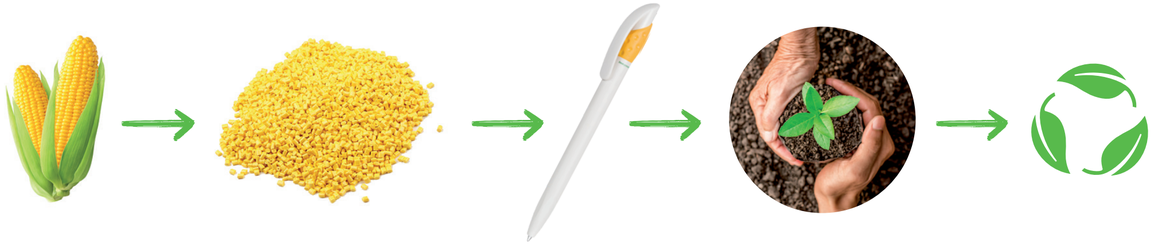
BIODEGRADABLE



EN Our „green" pens are produced with a new bioplastic of natural origin: born from renewable resources of agricultural origin (non genetically modified corn starch) and return to the earth through biodegradation and/or composting processes without releasing polluting substances (also the dyes used are biodegradable).
The pens produced with this new bioplastic (except refill and spring) are 100% biodegradable responding to the demand for consumer products with low environmental impact.

IT Le nostre penne „green" sono prodotte con una nuova bioplastica di origine naturale: nascono da risorse rinnovabili di origine agricola (amido di mais non geneticamente modificato) e tornano alla terra attraverso processi di biodegradazione e/o compostaggio senza rilascio di sostanze inquinanti (anche i coloranti usati sono infatti a base biodegradabile).
Le penne prodotte con questo nuova bioplastica sono biodegrabili al 100% (eccetto refill e molla) rispondendo alla domanda di prodotti di largo consumo a basso impatto ambientale.

FR Nos stylos „green" sont fabriqués avec une nouvelle bioplastique d'origine naturel: ils arrivent de ressources renouvelables d'origine agricole (Amidon de mais, pas modifié génétiquement) et retournent dans le terrain parmi des procés de biodégradation et de compostage sans relacher des substances polluantes (Les couleurs aussi sont réalises avec une base biodégradable)
Les stylos réalises avec cette nouvelle bioplastique sont biodégradables au 100% (hormis cartouche et ressort) en répondant à la demande de produits de grande consommation et avec un petit impacte environnemental.

ES Nuestros bolígrafos „green" se producen con un nuevo bioplástico de origen natural: nacen de recursos renovables de origen agrícola (almidón de maíz no modificado genéticamente) y vuelven a la tierra a través de procesos de biodegradación y / o compostaje sin liberar sustancias contaminantes (también los colorantes utilizados son biodegradables).
Los bolígrafos producidos con este nuevo bioplástico son 100% biodegradables (excepto el muelle y la carga) respondiendo a la demanda de productos de consumo con bajo impacto ambiental.

RU Наши ручки „Green" изготавливаются из материалов природного происхождения – нового биопластика, созданного на основе возобновляемых ресурсов сельскохозяйственного происхождения (генетически не модифицированный кукурузный крахмал) и по окончанию жизненного цикла продукта возвращаются в землю в процессе биоразложения и/или компостирования без выделения загрязняющих веществ (используемые красители также являются биоразлагаемыми)
Ручки „Green", изготовленные из этого нового биопластика, на 100% биоразлагаются (за исключением стержня и пружины), что соответствует современным требованиям к товарам с минимальным влиянием на окружающую среду.

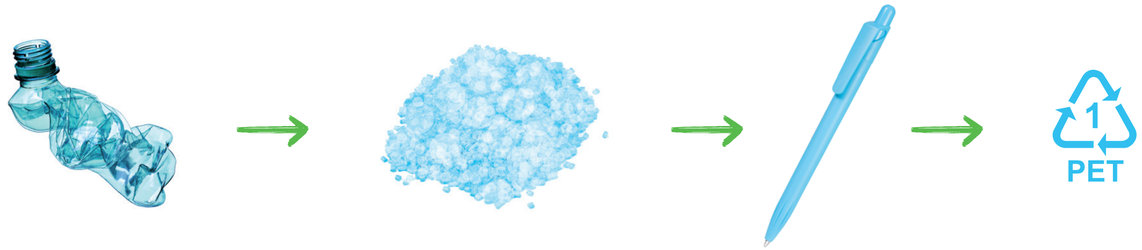
rPET

NEW!



1 BOTTLE = 1 PEN

EN „rPET line" is a line of writing articles made with recycled PET coming from the collection of water bottles and / or drinks.
Once the differentiated collection is carried out and the material is transported to special sorting centers, this is shredded and regenerated in the form of flakes and granules. Thanks to its characteristics, PET can then be reused to create new products because during the recovery process it does not lose its fundamental properties. The recycled PET thus becomes rPET.

IT „rPET line" è una linea di articoli da scrittura realizzati con il PET riciclato proveniente dalla raccolta delle bottiglie d'acqua e/o bevande.
Una volta effettuata la raccolta differenziata e trasportato il materiale in appositi centri di smistamento, questo viene triturato e rigenerato in forma di scaglie e granuli. Grazie alle sue caratteristiche, il PET può essere poi riutilizzato per dar vita a nuovi prodotti poiché durante il processo di recupero non perde le sue proprietà fondamentali.
Il PET riciclato diventa così rPET.

RU „rPET" – это линия пишущих принадлежностей из переработанного „recycled PET" материала на основе сырья из бутылок для воды и других напитков.
После проведения раздельного сбора отходов и транспортировки этого материала в специальные сортировочные центры, его измельчают и регенерируют в виде хлопьев и гранул. Благодаря своим характеристикам, PET может быть повторно использован для создания новых продуктов, потому что в процессе обработки он не теряет свои основные свойства. Таким образом, переработанный PET становится rPET.

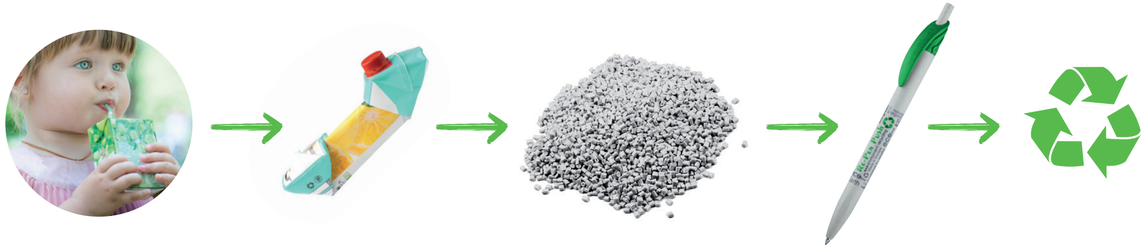
BEVERAGE CARTON RECYCLED



(EN) EcoLine is a line of writing instruments made in a special material coming from the recycling of beverage cartons.
Beverage cartons are in fact composed of several layers: cellulose, polyethylene and aluminum. After a first processing for the recovery of cellulose, the fraction of polyethylene and aluminum is further processed to generate a new second raw material.
This recycled material has a very particular aesthetic aspect (thanks to the presence of aluminum together with the plastic component) which distinguishes it from any other on the market.

(IT) EcoLine è una linea di articoli da scrittura realizzati con uno speciale materiale proveniente dal riciclo dei cartoni per bevande.
I contenitori per bevande sono infatti composti da diversi strati: cellulosa, polietilene ed alluminio. Dopo una prima lavorazione per il recupero della cellulosa, la frazione di polietilene ed alluminio viene ulteriormente lavorata per generare una nuova materia prima seconda.
Questo materiale riciclato si presenta con un aspetto estetico del tutto particolare (grazie alla presenza dell'alluminio unitamente alla componente della plastica) che lo contraddistingue da ogni altro sul mercato.

(RU) EcoLine – это линия пишущих принадлежностей, изготовленных из специального материала на основе переработанной упаковки для напитков. Пакеты для напитков состоят из нескольких слоев: целлюлозы, полиэтилена и алюминия. После извлечения целлюлозы фракция полиэтилена и алюминия в дальнейшем перерабатывается в новое вторичное сырье. Этот переработанный материал отличается от любого другого на рынке благодаря наличию алюминиевого компонента в пластике.
